of Quality*

STUDY, RESEARCH AND DESIGN

The real strength of a firm starts with the ability of its study and research departments to always find the most suitable solutions to address market demands.

TESTING AND INSPECTIONS

A sophisticated test room enables careful testing of the quality of new products before they are put on the market.

ASSEMBLY LINES

Dedicated equipment specially designed to facilitate assembly operations, at the same time allowing an effective and automatic control of quality.

STORAGE OF COMPONENTS

Our vertical stores enable quick and careful preparation of the components and spare parts intended for assembly and sale.

HOSE REELS FOR FLUID AND CABLE REELS

WHEN CHOOSING A HOSE REEL IT IS IMPORTANT TO CONSIDER:

- type of fluid to be dispensed
- delivery in l/min to be dispensed
- length and width of the hose to be used
- pressure of the fluid

Air-Water **20/400 bar**

Oil and allied products **150 bar**

Grease **400 bar**

Diesel fuel **10 bar**

AdBlue® **10 bar**

Oil-Water **200 bar**

Oil-Paints **200 bar**

Welding **20 bar**

LPG-methane **20 bar**

You can choose some hose reels versions with different colours besides the standard one	RAL 7035	RAL 1004	RAL 3020	RAL 5002	RAL 9005

CABLE REELS

Advantages

- Electric collector designed for better performances also with high currents.
- Thermal protector against overheating of the rewinded cable mounted in all the models.
- IP44 protection degree provided for all the electrical parts.
- Spring tested for more than 10 working years with the possibility to easily adjust the rewinding force.
- Cable guide with rollers equipped with 4 rollers in each model designed to save the work life of the cable.
- Different options for different needs: rewinding clutch, bayonet bracket and protection cap.
